CORRECTIONS

We make every effort to ensure that information presented within this publication is accurate and timely. The following notes are corrections for the Houghton magazine published in Spring/Summer 2011.

Robert Hill ’65 died on August 26, 2009. The date was incorrectly listed on page 30 as September 16, 2009. Additionally Hill has no stepchildren as was incorrectly listed. He has two children and three grandchildren.

Chester Rudd ’51 is survived by his wife of 58 years, Ruth (Knapp ’51); his six children, Marjorie Webber ’75, Richard Rudd ’78, Valerie Schermernhorn ’78, Daniel Rudd, Andrew Rudd ’83, and Peter Tang ’89; 17 grandchildren; and four great-grandchildren. His family was incorrectly cited on page 28.
At Houghton, students are called out of the smallness of our self-centered consumer society into the larger world of community, of service, sometimes even of sacrifice.

—SHIRLEY A. MULLEN
A WORD FROM THE PRESIDENT

private residential education is a costly commodity. It involves a significant investment of resources in relatively few people. A private education has always quite appropriately had to ‘make its case’ in a democratic society. This pressure is even stronger today in a struggling economy—when it seems less and less feasible for individuals who want to access a private education to do so.

Part of making the case for Houghton in this moment involves affirming at the theoretical level what makes a Houghton education distinct within the larger world of higher education. This speaks to what many Christian families are wrestling with today. Why pay for a private education—and especially a private Christian education—when there are less expensive ways of getting a college degree? How do I know this investment will pay off in an uncertain economy?

An even more compelling case for a Houghton education is the cumulative story of the rich and varied lives that our students and alumni are equipped to live.

At Houghton, students are called out of the smallness of our self-centered consumer society into the larger world of community, of service, sometimes even of sacrifice. They are called beyond their initial dreams for their own future into adventures that they never thought possible. They are called out of their own familiar world to explore other worlds—sometimes on the other side of the globe, sometimes in our own geographical ‘backyard.’ They are called, in short, out of themselves to see the world through the large and loving eyes of our Heavenly Father who invites them into partnership with His eternal purposes.

In this issue of the Houghton Magazine, you are invited to glimpse this cumulative story from several perspectives—current students and faculty, recent alumni and alumni who have spent a lifetime reaping the benefits of their Houghton education. Then you may judge for yourselves whether the case has been made.

We welcome your comments, your prayers and your partnership as we seek to steward faithfully this treasure of Houghton College in our time. Ultimately the final test of whether we have ‘made the case’ will be at that great accounting where God alone will be the judge.

Shirley A. Mullen ’76
President
THE CASE FOR A HOUGHTON EDUCATION
Like all institutions of higher education in these challenging economic times, Houghton must make its case. The value of a college education—and especially a private, Christian liberal arts college education—is not at all taken for granted. Why not attend the local public university and live at home? Why pay for four years at a private college when I could go to a community college for two years for less? Why go to a Christian college when I could stay in my local church, attend the local university, perhaps even get involved in a campus Christian organization, and avoid going into debt all at the same time?

One might be tempted to build a case around the near-perfect match between the long-established qualities of a Houghton education and the needs of our 21st century world.

GLOBAL CITIZENS
With the center of the global economy and the global church shifting away from Europe and North America, the world needs graduates with global competence and global connections. Houghton’s new Center for Faith, Justice and Global Engagement highlights the college’s long-standing commitment to preparing global citizens through our intercultural studies major, Mayterm travel-study programs, Houghton semester programs in Tanzania, Australia, and the Balkans, international sports ministries, Global Christian Fellowship, Teaching English to Speakers of Other Languages program, and the more recent partnership with World Hope International in Sierra Leone. Houghton knows how to prepare graduates for a global world.

CRITICAL THINKING AND PRACTICED IMAGINATION
With the increasing specialization of academic disciplines and the increasingly complex and interdisciplinary nature of the world’s real problems, the world needs graduates with both logical skills and a practiced imagination. As Daniel Pink asserts in *A Whole New Mind*, the future belongs not to those with “logical, linear, and computerlike capabilities,” but to those with “inventive, empathic, big-picture capabilities.” What better way to prepare for this new world than at a college known for decades for both rigor in the sciences and the creative arts?

It is no accident that Houghton’s Science Honors Program prepares students to work on the ‘real world problem’ of alternative energy by training them in a variety of disciplines – history and writing, as well as biology and physics.

LIFELONG LEARNERS
With the pace of change faster than at any other point in history, the world needs graduates who know how to learn, how to be flexible, and how to adapt to new circumstances. What better way to prepare for that world than with an education that equips graduates to be lifelong learners, savvy readers of texts, clear writers and speakers, effective askers of probing questions, and intellectually curious?
SUSTAINED AND THOUGHTFUL DIALOGUE
When sound bites are the norm in public discourse and polarization is the chief characterization of society’s politics and religion, the world needs graduates who know how to carry on sustained and thoughtful dialogue that can bring people together. Houghton specializes in community. In the laboratory, on the athletic field, in philosophy club, through service projects, in off-campus programs, in chapel, in the residences, and in Bible studies. Houghton brings people together to make a difference in each other’s lives.

THE VALUE ADDED
I believe that the long-established gifts of a Houghton education are ideally suited for effectiveness in today’s world. I am also aware that higher education as a whole—large universities as well as liberal arts colleges—is using the same language. Nearly everyone is talking today about preparing ‘global citizens,’ ‘educating whole people,’ ‘developing real-world problem-solving skills,’ and ‘preparing graduates to make a difference.’

While I welcome the fact that Houghton shares with a host of others in the academy the commitment to bring the gifts of education to a hurting and broken world, there is more to the value of a Houghton education than its preparation for global effectiveness, integrated thinking, problem solving, lifelong learning, and community building.

We believe that true learning begins when one’s intellectual growth occurs alongside the development of one’s fundamental moral and spiritual commitments, rather than in isolation from them.

For one thing, Houghton, unlike so much of higher education, is explicit about the ultimate grounding of our search for knowledge and understanding. Our desire for knowledge is embedded in our desire to know God, the father of our Lord and Savior Jesus Christ—to love Him with all our mind, our heart, our soul and our strength—and to come to love and care for the world that He has made.

Second, at Houghton, we believe that every educational community starts with a ‘learning covenant.’ Every educational institution starts out with certain assumptions about what is appropriate for discussion in the classroom, what guides and what limits our search for knowledge, how values are arrived at, how professors are to be involved in students’ lives, etc.

At Houghton, we are explicit about this ‘learning covenant.’ We believe that questions about meaning and purpose are as much a part of the ‘cognitive furniture’ of the classroom as the traditional content of a course. Houghton graduates should be as thoughtful and mature in their Scriptural and theological understanding as they are about their psychology or chemistry.

We believe that learning happens best in the company of professors who, along with modeling excellence in their disciplines, also model excellence that is grounded in their relationship with Jesus Christ in such life skills as making choices, keeping promises, and sustaining commitments.

Third, at Houghton, we believe that it takes more than education—even a very good education—to make the world a better place. As important as an education is, it remains, in the end, a tool—a tool whose impact is shaped by the purposes of those who use it. It is worth remembering that some of the worst atrocities of the 20th century happened in cultures known for their academic and technical excellence.

At Houghton, our ultimate hope for students and for our world is grounded in the loving purposes of a God who created us and invited us to participate in His redemptive plans for our lives and for all of Creation. It is the value of spending time in an academic community that is organized around responding to that invitation—in the classroom, in the residences, in the laboratories, on the athletic field, in ensemble practice—that makes a Houghton education worthwhile, for our students and for the sake of the world.
LESSONS from the BORDERLAND
I discovered how academics and my learning thus far helped me to know how to gain understanding.

In my time in the borderland, God gave me a new perspective – one that I could carry back to Houghton with me, as God tugged me into dormitories, lectures, and extracurriculars once again. Community meant balancing work with a social life, with service beyond structure and formality. The liberal arts could shape me all the more to be able to grow in knowledge, not just about culture and language, but about the economics and politics of the wide and beautiful variety of people I will get to know, work with, and have relationships with.

Returning to Houghton further challenged, stretched, and solidified my new perspective which considered building relationships to be serving God and to be more valuable than work. Through community and through learning how to understand the world around me – both strongly encouraged and practiced at Houghton – I can be formed all the more as a servant of God.

As a soon-to-be Houghton graduate, I pray to find work and community that serve God. Not simply through research, writing, or hanging out casually, though these are good. It is my hope to glorify God through building relationships and by applying the thought and careful attention of what I’ve learned through my class work. I want to always be learning, especially from God. Whether He uses a three-year-old, a new culture, the testing of my own cynical doubts, trying assignments, or anything else, I have no doubt that God will be constantly forming me. The best part? This will only draw me closer to Him.
steadfastness and peace
When I first began my journey at Houghton, I could not fathom the breadth of flexibility that this Christian liberal arts institution would allow me. Houghton is a place that embodies the excellence of liberal arts along with the message of Christ. It is unapologetic about either one.

Before deciding on Houghton, I applied for and received a full scholarship to study biology and English at a top-ranked Canadian university, yet I felt drawn to Houghton. Academically, Houghton is a challenging place where students are serious about their studies. In particular, the Houghton College Biology Department impressed me with the caliber and drive of both its students and its faculty. Ultimately, I came to Houghton to pursue academic excellence.

While studying biology at Houghton, I have participated in two collaborative research projects with Dr. Aaron Sullivan. For the first research project, we looked at predator-prey interactions in dusky salamanders, and for the second research project, we looked at predator-prey interactions in bullfrog tadpoles. During those research projects, I learned how to utilize the scientific method and good laboratory practices, skills that prepared me well for my last summer job where I designed clinical trials for a large biotechnology firm.

I discovered that I could study both biology and writing in a span of four years. In my writing classes I have had the privilege of studying under accomplished critics, poets, and essayists. During the 2008 Houghton Writing Festival, I had the opportunity to workshop a couple of my poems with Scott Cairns, a nationally acclaimed poet and poetry professor.

Houghton has shaped not only my academic career but also my walk with Christ. Houghton College is a place where ‘scholar-servanthood’ is both preached and practiced. Seeing the examples of my professors and fellow students, I daily witness displays of humility and gentleness that are as encouraging as they are challenging. The culture of a place can have a great impact on a person’s life. Houghton’s culture of humility and gentleness developed in me steadfastness and peace that will remain long after graduation.

Willard J. Houghton, the college founder, often spoke of “fixing up the world.” This statement, which may initially appear arrogant or presumptuous, is actually an offering of one’s life to God. In a world where many people are serving their own purposes or operating out of their own bias, people who are using their talents to look after the agenda of Christ is an uncommon thing.

Nearing the conclusion of my four years at Houghton, I cannot help but look back with some amazement and a lot of gratitude on the experiences that have brought me to this particular place in my journey. As I prepare for graduation in May, I acknowledge the wonder of my time here. Houghton is a unique community, committed to both academic excellence and holiness. Neither are simple pursuits. Indeed, to attempt both is to take up Willard J. Houghton’s challenge of “fixing up the world.” This requires acknowledging the shortcomings of human ambition and asking God to be an active participant in our lives.

Looking forward to the next stage in my life, I am unsure of my future plans. I do not have a specific set of expectations for what I will be doing. I do, however, have a specific set of expectations for how I will be doing it. I wish to pursue the next stage of my life, which may contain graduate studies or medical school, with a mindset that combines both academic excellence and spiritual fervor. Houghton has shown me that these do not need to be mutually exclusive — in fact, they should go hand in hand.

Houghton’s culture of humility and gentleness developed in me steadfastness and peace that will remain long after graduation.
I believe that Houghton truly EQUIPPED us to handle life in ‘the real world’ in a DISTINCT and UNIQUE way.
I started working for the U.S. Department of Defense two weeks after graduating from Houghton in May 2010. Even after graduating and leaving the stability of campus life, a Houghton community emerged around the nation’s capital.

My first roommates in Washington, D.C. were Stephen Ross ’10 and William Airhart ’08. Steve was starting an internship with a firm specializing in global food and nutrition, and Will, a first-year law student at Vanderbilt University Law School, worked as an intern for the U.S. District Attorney for Eastern Virginia and Houghton graduate Neil MacBride ’87. At the end of the summer I was joined by another Houghton graduate, Steven Grudda ’10, who interned at the Center for Strategic and International Studies in downtown D.C. Around the same time, Jennifer Steinhoff ’10 and Elyse Drum ’08 moved to the D.C. area. Jen had been working in the Office of Policy and Governmental Affairs for the Federal Highway Administration and Elyse worked as a staffer on Capitol Hill.

I shared in the successes of these Houghton alumni and watched them deal with challenges that were put in their paths. I believe that Houghton truly equipped us to handle life in ‘the real world’ in a distinct and unique way. Experiences from my own Houghton journey, taking me from Costa Rica to Washington, D.C., back to Houghton and then to Africa, prepared me well for my current vocation.

I traveled to Costa Rica over May term in 2008 to study Spanish for three weeks. An important lesson learned during this experience was the recognition of the need to live selflessly — to bear the burdens of the brothers and sisters who lived and worked around me. A college education is in itself a selfish endeavor; as we seek to train ourselves and prepare for a career, it is easy to forget to live in the moment and for those who exist around us. In Costa Rica, I started to experience the truth behind a statement President Mullen once made: that our entire lives can be summed up by our relationships.

Over the next year, replacing selfishness with selflessness strengthened as a theme in my life. I worked as a summer intern for the U.S. Air Force Office of Public Affairs and served as Student Government Association president at Houghton in the fall. Often I found that I succeeded far more in the workplace (and in Houghton public office) when I took the time to focus on my relationships with those around me. A selfish person is often an inflexible person, unwilling to go out of his or her way or try something new. The strongest application of this principle came as I returned to Houghton in the fall. I focused on making relationships with incoming freshmen, sharing my personal testimony in a freshmen chapel. It was really encouraging to return to Houghton recently and see a large number of the freshmen I developed relationships with in leadership positions on campus.

In the spring of 2009 I traveled to East Africa on the Go ED. Africa program. After five weeks in Kampala, Uganda attending classes, I headed into the field for a month-long internship where I worked as a social worker in a former conflict zone. The last five weeks of the semester were spent in Kigali, Rwanda studying the effects of the 1994 genocide, where close to 1,000,000 people were killed by their friends and neighbors. Fifteen students from Houghton studied alongside me on Go ED. Africa, along with five from other colleges and universities. We learned and discussed peace-building, transformational development and poverty by working alongside skilled practitioners. We learned the importance of creative and flexible problem-solving and learned to rely on the strength of each other in our weak moments.

In Washington, D.C., it seems that a Houghton alumnus or alumna or student is always right around the corner. This spring I was invited to participate in a consultation on U.S. nuclear weapons policy put on by the National Association of Evangelicals. A Houghton student, Megan Toombs ’12, and alumnus Paul Vicalvi ’70, executive director of the NAE Chaplains Commission, joined in this dialogue that was designed to reimagine a policy that looked past Cold War ideology and toward the future of our planet. Creative ideas grounded in a common faith were put forward and candidly discussed by everyone at the table.

The most recent Houghton graduate to join the D.C. contingent is my wife, Sophie (Huber ’10), who works for Christian Connections for International Health, a global health organization that brings together faith-based and secular organizations in the global health field.

Every day I see Houghton students and alumni live out their lives furthering the Kingdom and changing the world. My experiences, as well as the experiences of many others, have truly prepared us to make a difference. Without our Houghton education, we would not be as well-equipped to face the unique challenges of the world today.

I will always count Houghton as home, a strong community preparing graduates to transform the world. I am excited and honored to be a part of that legacy.
Emily Gaerte ’12 has been riding past the red-bricked Cuba Specialty Manufacturing building on Route 19 for nearly 22 years—usually on her way to somewhere else. Last spring Emily had the opportunity to take a closer look at the fishing tackle factory through an assignment in her Advanced Topics in Photography class called Made in Allegany—a collection of visual essays by the class about local producers in and around Allegany County.

“I wanted to pick a manufacturer that was right in my backyard,” says Gaerte. The factory, located just three miles away from her home, produces top-notch fishing products that are shipped around the world. “I had no idea that Cuba Specialties was such a large, far-reaching business.”

For the assignment, Assistant Professor of Digital Media and Photography Ryan Thompson sent students out into the community to solicit participation from local producers “based on their own interests, as well as what they thought might make for a compelling visual essay,” says Thompson. Then the students arranged to spend time with their subjects, documenting their processes and products. The resulting photographs were edited, captioned and archived at the Made in Allegany website. Thompson was pleased by the wide range of local producers that were represented. “Everything from a hobby woodworker to a dairy with automated milking ‘robots’” can be seen on the website.

“It’s one thing for students to dream up an interesting photography project and cajole their friends into participating or posing for it,” says Thompson. “But it’s a far greater challenge for them to practice the photographer-client relationship which is required in so many photography-related careers.”

Emily Sachar ’11 chose to highlight the Angelica Sweet Shop for her visual essay. Owners Karen and Don Ash have been providing sweet treats for residents and businesses in Allegany County since their opening six years ago. “We are always delighted to interact with Houghton students,” says Karen Ash, “and particularly pleased to have been selected as part of this project. The young woman who created the Angelica Sweet Shop photo essay was professional, insightful and engaging. She asked about our target market, our selection of products, our distribution channels…questions you’d expect from a marketing student, but not necessarily from a photography student!”

“The students’ reactions to both the idea for the project, as well as the finished product, were overwhelmingly positive,” says Thompson. “Many of them came back from their visits not only with hundreds of photos to choose from but with exciting stories to share. It reinforced for me how truly interested Houghton students are in engaging the broader community in which they live and work.”

Feedback from community members since the Made in Allegany website went live last June has also been positive. Many loved getting an ‘inside view’ or ‘behind the scenes’ peek at what various local producers do and make on a daily basis. “For those of us who live in the local community, these essays offer a reminder to engage and support our local producers,” adds Thompson.

Thompson hopes his students will take more away from the Made in Allegany project than just learning how to tell a compelling visual story. “We live in a time and a place that is deeply disconnected from the people and the places that produce most of what we own and consume,” says Thompson. “This assignment is premised on the understanding that local production is a productive and necessary part of any healthy community. It also is a simple exercise in being curious about the place in which we live. How do people make a living in this time and place? What is being made locally, right in our backyard? When students go out and interact with these local producers, they become much more likely to keep them in mind when making purchases themselves. So the impact is hopefully both symbolic as well as tangible.”

For more information, and to see all of the visual essays done by Thompson’s students, go to www.madeinallegany.com.
I look back on that first day at Houghton and am continually grateful. I discovered the things I was seeking—and much more.
In the late summer of 2003, I piled into my parents’ red Ford Taurus with all my belongings in tow and headed east. After driving for almost eight hours, we pulled onto Willard Avenue and my hometown of Huntington, Ind., felt like a million miles away. The sea of faces I encountered at Houghton provided exactly the welcome I needed. As a 19 year-old I was eager to discover and experience what the college promised to deliver: a globally-minded, academically challenging and faith-enriching college experience.

I transferred into Houghton my sophomore year as an intercultural studies major. I was unsure of the specific direction I would take; however, readings and discussions in courses such as Relief and Development, Cultural Anthropology, Sociolinguistics, and Modern Missions made me truly come alive. The opportunity to study abroad in a place like Tanzania with a professor like Dr. Arensen affirmed my decision to attend Houghton and further enhanced my overall experience in ways that I had not anticipated.

My classes were filled with students from around the globe and my courses were taught by professors who had valuable experience in a variety of nations. Real-life examples from Professor Gallman’s time in Papua New Guinea, Professor Shea’s work in Sierra Leone, and Professor Arensen’s years in East Africa were a common part of class discussion. Conversation was rich and I sensed a deep desire among my peers to be culturally sensitive.

I didn’t know the specifics of how my coursework would prepare me for a career after graduation, but I was hopeful that I would be well-equipped to work in a variety of arenas. Again, Houghton did not disappoint.

After graduating, I moved to Phoenix, Ariz., and worked for Food for the Hungry and StreetLight. The mission of StreetLight is to eradicate child sex slavery through awareness, prevention and holistic care. Upon moving to the city, I quickly discovered that the global issues and complexities of poverty that we had discussed in class were very much alive and well in the United States. It was during my time with Food for the Hungry that I discovered domestic minor trafficking, specifically child rape for profit, was happening in the United States. I never thought that an issue as heinous as human trafficking could be occurring in my own backyard, but my eyes were quickly opened to that truth. My team discovered that few people knew that this injustice was happening in Phoenix, so we set our minds to educate and inform.

I had the privilege and challenge of producing a documentary called Branded that depicted the realities of sex trafficking across the U.S. and specifically in Phoenix. It was an incredibly difficult experience but one that forever changed my life. I had no background in film, but the communication skills that I built at Houghton helped ensure that I was able to interact with the incredibly unique people we met while putting the film together.

The main goal of Branded was to raise awareness of child rape for profit and to move people from disbelief to action. Thankfully, the film did that very thing. Since 2008, a movement of thousands of passionate abolitionists have come together to seek justice for untold numbers of innocent children. Much more can still be done, but incredible progress has been made.

Eight years after my arrival at Houghton, I look back on that first day and am continually grateful. I discovered the things I was seeking—and much more. Some of my days in college were the most difficult of my life; however, it was a time of growth and healing that I could never have anticipated.

I have recently stepped away from working outside of the home in order to care for our new son, Micah. As I dream about what I desire most for him, I am hopeful that one day, when he is searching for his college of choice, he will find a college that is globally minded, academically challenging and faith enriching. And I certainly won’t be disappointed if he chooses to wear purple and gold!

View a trailer for Branded at www.streetlightphx.com.
“Convincing my father to support my desire for a college education at Houghton was quite a job,” says Claire (Ejov ’51) Reed.

“At that time he felt that women should be teachers or secretaries. I didn’t have a career in mind and it was expected that most of us would ‘just get married.’”

Born in 1930 during the Depression to Russian immigrant parents in Englewood, N.J., Claire recalls what it was like preparing financially for her education in a time when people didn’t take out student loans. She made her own clothes, babysat, became an au pair for a New York surgeon’s three children in the Poconos and took on miscellaneous part-time jobs.

Claire remembers her early days at Houghton: reading from original texts, writing an essay a day for six consecutive days for Professor Hazlett, learning to love history from Frieda Gillette (after hating it in high school), playing on the basketball and field hockey teams, having meals in professors’ homes and being supported by fellow students of faith. She graduated magna cum laude in 1951 with a double major in German and history.

As a new college graduate searching for work, Claire recollects wrestling with the question “What are you fit for with a liberal arts degree?” Her foremost ambition was to find something interesting and challenging. Indeed, her first challenge began with a job in the customer securities department of the prestigious Fidelity-Philadelphia Trust Co., dealing with stocks and bonds — something she knew nothing about.

“If you get a job you don’t know much about, then you do your homework and start learning,” says Claire. “If you need a job, you take anything and grow from there.” Following her job at the
bank, Claire became sales office manager for Franklin Electronics Corp., a private firm manufacturing high-speed digital printers in conjunction with Jet Propulsion Labs, used on tracking stations worldwide on the Apollo space launch by NASA.

The next chapter in Claire’s career led her to Temple University as program administrator for the department of psychiatry. “I thought if I could survive two years there I could do anything,” she laughed. “Well, I survived five years and had a lot of fun with it.” Claire was promoted and appointed grants manager officer for the newly created Temple University Health Sciences Center. She sees this job as particularly significant because there was no job description for her and she had to develop one on her own. In addition to her in-house responsibilities, Claire developed a computer program for grants administration which was recognized nationally. She was then invited to join the National Institutes of Health as an ad hoc consultant to evaluate potential funding for significant project grants in universities throughout the country. “That was the most fantastic thing in my entire career, working with scientists and being the sole female in the fiscal/administration arm of the committee.”

After a short stint at the Michigan Cancer Foundation, Claire finished up her career at Lehigh University in Bethlehem, Pa., eventually becoming the assistant director of the Office of Research. She successfully authored a research manual on the “Conduct of Research at Lehigh University.”

A third chapter in Claire’s life began in 1989. Having just retired from the university, she met and married Robert P. Reed, the love of her life. Bob was a mining engineer at Bethlehem Steel and a consultant with Air Products Corp. Claire and Bob traveled extensively; throughout her lifetime, Claire’s curiosity about other cultures took her to over 40 countries.

After 20 years together, Bob passed away in 2009. True to form, life began anew for Claire. At 80 years of age, she fulfilled a lifelong dream of owning a sport convertible by purchasing a Mazda Miata MX-5, joining the local Miata club, rallying with the boys and participating in autocross, a timed obstacle course race at the Portland International Raceway. “A few days before I was ready to go [autocross racing], I was going to cop out of it and I said, No, I’m going to go try it. Even if I knock all the cones down on the obstacle course, I’m going to just go to see if I can learn how to handle my car.” Upon signing up, she was contacted by the person in charge of registration. “He says, ‘Claire, would you please submit your correct birthday? There seems to be a problem.’ I said, ‘Well, sir, sorry, it is the correct date. I’m a member of the Miata club. I rally with the boys and I passed their initiation test.’”

As Claire reflected on her career, she felt her curiosity and determination, together with an ability to think, write and communicate effectively, drove her to be successful at jobs she had no training for and that were usually held by men. “I’d get a little scared about a new job, and I’d think, ‘Well, if somebody else has done it, I can do it. With the help of God I can do it.’” To current Houghton students, Claire recommends heavy doses of discipline and courage, aided by the liberal arts education that prepared her for anything. “I got history, psychology, science…and somewhere along the way, I’ve made a job out of all of them.”

In summary, Claire says about herself, “My firm belief in a personal God and a curiosity which continues to take me to new experiences throughout the world show that I am living life to the fullest in spite of many disappointments and setbacks along the way.”

“I’d like to be remembered as loving God and telling about His impact in my life over the years — how faith can really make miraculous things happen. I have no idea what my future holds. I start each year wondering what the New Year will bring…Life just seems to unfold for me.”

To current Houghton students, Claire recommends heavy doses of discipline and courage, aided by the liberal arts education that prepared her for anything. “I got history, psychology, science…and somewhere along the way, I’ve made a job out of all of them.”
At Houghton College, we are compelled to bring healing and wholeness, both spiritually and physically, on our earth.

The broader liberal arts is a concept lived actively in this college and in many ways is the enduring purpose of this building. It is exciting to see it, both physically and in its vision, renewed and rededicated to the education of the next generation of students of Houghton College.”

Dr. Linda Mills Woolsey ’74, interim dean of the college, led a liturgy of dedication, and Robert V. Davidson ’65, Board of Trustee member, concluded

Houghton College recently completed a $4.1 million update to the Paine Science Center and formally dedicated the upgraded facility on Saturday, October 8, 2011 during Homecoming. Construction began on December 2, 2010 and was completed on August 29, 2011 in time for the start of the fall semester. The dedication featured special speakers, tours of the facility and a litany of dedication.

WHY THIS PROJECT MATTERS FOR HOUGHTON AS A COLLEGE

Houghton College President Shirley A. Mullen ’76 highlighted Houghton’s longstanding culture of scientific research and collaborative inquiry and the impact that advanced technology and resources have on research merit and academic repute. “These facilities allow Houghton to be a place where students who feel called to be scientists may do science with a spirit of excellence and with love for God’s creation,” Mullen stated.

WHY THIS PROJECT MATTERS FOR THE WORLD

Associate Dean of Natural Sciences and Mathematics Keith A. Horn ’75, spoke on why this project matters for the world. Horn addressed the most current and crucial global issues, including sustainability, clean water, poverty gaps, health, peace and conflict. “At Houghton College, we are compelled to bring healing and wholeness, both spiritually and physically, on our earth.”

WHY THIS PROJECT MATTERS FOR STUDENTS

Doctor of Internal Medicine Mark Lindley ’79 emphasized that the people, not the building, are what make up the science and math division; thus, it is essential to build up students who can effectively use tools and resources in both scientific and nonscientific contexts. He conclusively stated: “This marriage of technology and scientific understanding with the broader liberal arts is a concept lived actively in this college and in many ways is the enduring purpose of this building. It is exciting to see it, both physically and in its vision, renewed and rededicated to the education of the next generation of students of Houghton College.”

Dr. Linda Mills Woolsey ’74, interim dean of the college, led a liturgy of dedication, and Robert V. Davidson ’65, Board of Trustee member, concluded
Quick Facts

CONSTRUCTION
16,098 net square feet
$4.1 million with no debt incurred
11 labs, five classrooms, four offices, math student study library, machine shop, faculty lounge and kitchenette
Woods: native black cherry & maple
Start date: December 2, 2010
Occupancy date: August 29, 2011

NATURAL SCIENCE AND MATH DIVISION
Majors offered: Biology, Chemistry, Biochemistry, Math, Computer Science, Physics, Applied Physics
230 majors
70 pre-medical students
19 faculty
More than 3,000 living natural science and math alumni

with a dedicatory prayer. After the dedication ceremony, tours of the new facilities were given by current Houghton science and mathematics students.

LITANY OF DEDICATION
Gracious Lord, we thank you for the gift of intelligence and the call to wisdom. We thank you for your creation, whose mysterious and elusive laws we study. We thank you for matter and energy, for systems and cycles, for waves and particles. We thank you for living cell and complex organism, for the gift of life in all its forms. We thank you for order and for anomalies. We thank you for reason, method, and measurement. We thank you for the mathematics that help us to express our insights and to ponder patterns even in chaos. May we gladly learn and gladly teach as wise stewards of your creation.
Picture-perfect fall weather graced the Houghton campus for Homecoming & Family Weekend, October 7–9, 2011. Record attendance resulted as students, alumni, parents, family members and community members filled Houghton’s campus.

Alumni reunions moved from the summer months to coincide with Homecoming this year. Class years ending in ‘1’ or ‘6’ celebrated their reunions with class gatherings on Friday and a reunion banquet on Saturday evening. The Class of 1986 met again after 25 years, the active Class of 1971 had a reception at the home of Richard ‘71 and Virginia (Alexander ‘71) Halberg, and alumni from as far back as the 1946 made the journey to Houghton!

Friday’s festivities began with the Founder’s Day chapel, where Cornelius Plantinga was the featured speaker. Plantinga, a former president of Calvin Theological Seminary, has published more than 230 articles and essays and has authored five books. During the Founder’s Day service, Rolland Kidder ’62 was presented with the Alumnus of the Year Award. Kidder currently serves as director of National Fuel Gas Company and previously served as a patrol officer in the U.S. Navy, a New York State assemblyman and earned a law degree from State University of New York at Buffalo Law School. Other Friday activities included a golf tournament, the Homecoming College Choir concert followed by fireworks on the Quad, and a Cirque do Soleil-inspired dance held by students in the parking lot between the Campus Center and Gillette Hall.

Saturday began with the 5K Fun Run and continued with the Fall Festival on the Quad (with inflatable games, face-painting and balloon stations, pie-smashing contests, and more) and athletic contests. The day ended, as usual, with the widely anticipated, intricately planned SPOT.

Activities coinciding with the Paine Science Center dedication also occurred throughout the weekend, including the well-attended Interactive Science Experiences. (See Science Center article for details.)

Many parents and families made the trip to see their students and participate in the weekend’s activities, culminating with a Family Weekend Worship Service and breakfast reception with President Shirley A. Mullen ’76 on Sunday morning.

For more on Homecoming, read our student blogs, watch the Homecoming & Family Weekend slideshow, and view reunion photographs on the Houghton Magazine website: www.houghton.edu/magazine.

01 Class of 1956 gathers for an impromptu hymn sing.
02 Angela (Keppen ’98) Babbitt and Juniper Babbitt, future class of 2032.
03 Lois McKnight ’56 participates in the Fun Run.
Jon Arensen, professor of anthropology and director of the Houghton in Tanzania Program, led a two-week anthropology seminar last spring in Addis Ababa, Ethiopia. The seminar was sponsored by SIL International, and each of his lectures was presented by Jon Arensen, professor of anthropology. His article titled “The Music of the Spheres: Music and the Divine Life in George Steiner and Robert W. Jenson, Part Two” was published in *Crucible* in September 2011.

Laurie Dashnau, professor of English and director of the writing center, presented a paper titled “The Swirl and Swing of Pictures and Words: Emotion in the Medium and Messages of Art Spiegelman’s *Maus I* and *Maus II*” on October 1, 2011 at the 2011 New York College English Association Conference.

Richard Eckley, professor of theology, and W. Christopher Stewart, professor of philosophy, presented “Strategies to Promote the Search for Meaning and Vocation in Undergraduates: Non-Traditional and Traditional Students” at the Council of Independent Colleges Conference in Indianapolis, Ind. in March 2011.

Richard Halberg ’71, professor of business administration, and Peter Meilaender, professor of political science, were recently selected to receive an all-expense-paid professional development opportunity to attend the 2011 Free Market Forum in Atlanta, Ga., co-sponsored by the Council for Christian Colleges & Universities.

Kelley Hijleh, instructor of voice, served as a clinician for the Dansville Vocal Master Class Series held in April 2011 and was invited to present on registration in the female voice at Voce Vista workshop at State University of New York at Fredonia in June 2011. She was also the choral director for Vivace Sings!, the choral experience of the Vivace String Camp held in Houghton in August 2011.

Mark Hijleh, associate dean for academic administration and professor of music, will be presenting his research on world music theory at the national conferences for the College of Music Society as well as the Society for Ethnomusicology. His book on that subject, *Towards a Global Music Theory: Practical Concepts and Methods for the Analysis of Music Across Cultures*, is scheduled to be published next year.

Dave Huth ’95, associate professor of vocal music & conducting, presented a workshop together at the Soularize 2011 Conference in San Diego, Calif. Their presentation was titled “Haters Gonna Love: Communication That Doesn’t Suck, in a World of Conflict.”

Lori Huth ’00, assistant professor of creative writing, won first place with her short story “A Creature of a Different Kingdom” in the New Millennium Writings Fiction competition. She received a $500 prize and will be published in the next print edition. Additionally, she attended the nationally prestigious and competitive Bread Loaf Writers’ Conference in Vermont. An excerpt of her in-progress novel was used in a workshop by Pulitzer Prize finalist Joanna Scott, and Huth gave a reading at the Blue Parlor Reading Series.

Brandon Johnson, associate professor of vocal music & conducting and director of choral activities, appeared with the Houghton College Choir at the opening night of the Rochester Oratorio Society’s 66th season. This is the first time the Houghton College Choir has appeared on the ROS series. Additionally, Johnson began his official term as president of New York American Choral Directors Association.

Eli Knapp ’00, assistant professor of intercultural studies, was recently the lead author for an article published in *Oryx* titled “A Tale of Three Villages: Choosing an Effective Method for Assessing Poaching Levels in Western Serengeti, Tanzania.” He was also a co-author for “Responses to Alternative Rainfall Regimes and Antipoaching in a Migratory System,” an article published in *Ecological Applications*.

Kristina LaCelle-Peterson ’82, associate professor of religion and chair of the theology department, published a book (co-written with the late Richard Lyth), *Chasing the Rain: An African’s Quest for God*, was published by Old Africa Books in October 2011.
department, presented a paper at the Council for Christian Colleges & Universities Changing Faces Conference at Abilene Christian University in October 2010. Additionally, she presented a workshop at the Come to the Water Conference, hosted by the Wesleyan Holiness Women Clergy organization. She has authored a chapter on the topic of Christian women and body image titled “Wonderfully Made or Wonderfully Made-Up?” for the book Results May Vary. LaCelle-Peterson also wrote four articles for the Global Dictionary of Wesleyan Theology, including entries on the Armenian Church, asceticism, Free Methodism, and women in the Church.

Peter Meilaender, professor of political science and chair of the history and political science departments, wrote and/or published two book reviews over the summer: a review of Damir Skendervoic’s The Radical Right in Switzerland: Continuity and Change, 1945-2004 for German Studies and a review of Mark L. McPherran’s Plato’s Republic: A Critical Guide in the Bryn Mawr Classical Review. He has also written two articles for The Cresset (Valparaiso University) titled “On Paying Too Much Attention to Politics” and “Democratic Heroism.” Last spring he published “Public Policy & The Church,” co-authored with Mark Amstutz ’65, professor of political science at Wheaton College, in The City (Houston Baptist University). Meilaender also presented “The Ethics of Immigration Policy” to the Consultation on Immigration Issues of the Commission on Theology and Church Relations of the Lutheran Church in El Paso, Texas, and “Jeremias Gotthelf and the Problem of Poverty,” at the annual conference of the German Studies Association in Louisville, Ky., both in September 2011.

Ron Oakerson, professor of political science, co-authored an article with Roger B. Parks, professor emeritus at Indiana University’s School of Public and Environmental Affairs, titled “The Study of Local Public Economies: Multi-organizational, Multi-level Institutional Analysis and Development” for a special issue of Policy Studies Journal dedicated to the work of Elinor Ostrom, the 2009 Nobel Laureate in economics. He also participated in two prepublication events for the contributors to the special issue: a seminar at the School of Public Affairs, University of Colorado in 2010, and a theme panel chaired by Ostrom at the annual meeting of the American Political Science Association in September 2010.

Karen (Reese ’93) Torraca, associate professor of chemistry and chair of the chemistry department, and John Rowley ’03, assistant professor of chemistry, accompanied three students to the Western New York American Chemical Society Undergraduate Research Symposium at the State University of New York at Buffalo in April 2011. Students Danny Kim ’12 and Melissa Rosenburg ’12 presented a poster on research completed with Torraca in the area of the development of green oxidation methods. Josh Wallace ’11 presented a poster on research he completed with Rowley involving the development of biodegradable polymers and won first prize in the poster competition.

Kurt Vandock, assistant professor of biology, and three students, Darby Emerson ’11, Alyssa Rassman ’12 and Kathryn McLeod ’12, published a paper in the Journal of Membrane Biology: “Phospholipids Dependence of the Reversible, Energy-Linked, Mitochondrial Transhydrogenase in Manduca sexta” focused on further characterization of the mitochondrial protein and how it has been shown to be significant in insect development.

Christopher Wells ’05, assistant professor of physics, had “Dark Atoms: Asymmetry and Direct Detection” accepted to the Journal of Cosmology and Astroparticle Physics. The paper, a collaborative effort with academics from The Johns Hopkins University as well as from Massachusetts Institute of Technology, has already been cited four times in other scholarly research papers while still in peer review.
ALUMNI NEWS & NOTES

Houghton College welcomes all submissions to Alumni News & Notes. Due to space limitations, not all news items or photographs may be published and the college reserves the right to edit submissions for space and content. You can submit updates online at www.houghton.edu/magazine, via e-mail to magazine@houghton.edu, or by regular mail to the Marketing & Communications Office, One Willard Avenue, Houghton, NY 14744–0128. When sending in photos for publication please submit digitally in the highest resolution image available (preferably 300 dpi at 4 x 6”). Thank you for keeping in touch with your alma mater!

1929
Edith (Davis) Densmore, '105, passed away on August, 21, 2011 in Franklin, Ind. Densmore grew up in Freedom, N.Y. and taught high school English in Delevan, Wayland, and Greenwood schools. In 2008 she was interviewed as Houghton's oldest alumna. She was preceded in death by her husband, Dr. Alvin M. Densmore '30; and their son, Peter. She is survived by a daughter, Anne (Richard '63) Fero; and two grandsons.

1936
Frances (Hotchkiss) Little, '95, died on May 25, 2011. Following her lifelong passions of learning, reading, and music, Frances taught music for five years and was later a 1st grade teacher for 21 years in the Rush Henrietta School District. She is survived by her four children, Paul (Linda Finger '65) Little '65, Jane Neureuther '69, Anne Brown '71, and Thomas Little '75; 10 grandchildren, including Jennifer Little '93, Jonathan Little '95, Melissa (Neureuther '02) Wantuck, Melanie (Neureuther '04) Houck, Matthew Neureuther '05, and Nathanael Brown '05; and six great-grandchildren. She was preceded in death by her husband and a grandson.

1941
Le Roy [Roy] D. Bannister, '91, died August 31, 2011 in Rochester, N.Y. Bannister was a U.S. Navy veteran of WWII, achieving the rank of ensign. He was past president of the Albion School Board and taught in many school districts in New York, including Holland, Lyndonville, Royalton Hartland and Hilton. Bannister was also a farmer, an electrician and an artist. He is survived by his wife of 71 years, Doris (Nesbitt '41); children, Janis Hempel '64, Richard Bannister, Robert Bannister, Marcia Skinner '69, Le Roy (Susan Moore '75) Bannister '73, Lynn (Mitchell '76) Pierce '75, and Roger Bannister '78; 36 grandchildren, including Victoria Gerhardt '03; 19 great-grandchildren; and several nieces and nephews. He was preceded in death by his brothers, Harold and John Francis; and his sister, ElMarie.

1945
Gloria Jean (Marble) Martin, '85, passed away on July 31, 2011. She is survived by four daughters, including Deborah (Stephen '77) Cook '78; several grandchildren; and one great-grandson. She was preceded in death by her husband, James Martin '44.

1946
Helen (Loudon) Cross, '87, died on May 25, 2011 in Greenville, S.C. She studied music and taught elementary school and music for several years, as well as giving piano lessons to many students in Wilmington, Del. She is survived by her daughters, Jan and Sheryl; seven grandchildren; and eight great-grandchildren. Her husband, Bill, preceded her in death.

1947
Vivian (Schreffler) Troutman, '87, died on October 6, 2010. She was an English major at Houghton and worked for two years after graduation as a cataloger in the Houghton College library. She is survived by her husband of 60 years, Dr. Perry Troutman '49; a daughter, Lynda O’Sullivan; and a son, Philip Troutman.

1949
Beryl (MacMillen) Anderson received her master's degree from Ithaca College in May 2011 at the age of 86, five decades after beginning work on it. She wrote her final thesis in the late '50s, but marriage and work kept her two credits shy of the degree, and she began reworking and defended the thesis earlier this year.

Beverly Barnett is one of 50 stories featured in a book of stories told by military chaplains called Miracles and Moments of Grace by Nancy B. Kennedy '78. Kennedy's parents, James '49 and Arleen (Werres '50), were classmates of Chaplain Barnett.

Charles [Luke] Boughter, 86, died on July 17, 2011 in Scranton, Pa. Boughter served as an aviator in the U.S. Navy during WWII and afterward spent 25 years in Portugal where he and his wife, Harriet [Ruth] (Peyton '49), were missionaries with the
Wilson Greatbatch: Inventor, Benefactor, Motivator, Friend

Dr. Wilson [Bill] Greatbatch, 92, inventor of the fully-implantable cardiac pacemaker and long-time friend of Houghton College, died on September 27, 2011.

Greatbatch’s affiliation with Houghton College began in the late ’60s when he partnered with Houghton’s chemistry department to research the best materials for the implantable cardiac pacemaker’s electrodes, as well as researching the battery that would run his device. Greatbatch provided the department with up-to-date lab equipment and supported a half-time research position for Dr. Bernie J. Piersma, professor emeritus of chemistry, who had been doing his own research on electrodes in saline solution prior to his Houghton appointment.

In 1968 Greatbatch was named an adjunct professor of physical science and visited the college once or twice a semester to confer about the electrode and battery research and to do what he deemed his most important work: speaking and interacting with students. “He was energetic, enthusiastic and full of charisma,” writes Dr. Irmgard Howard, current professor of chemistry. “More than any other speaker, Greatbatch would challenge students to think beyond the narrow confines of their daily assignments and even beyond the artificial boundaries of their chosen academic disciplines.”

Another guiding principle of Greatbatch’s life was his conviction that both success and failure were out of his hands. “I think that the good Lord doesn’t really care whether [I] succeed or fail,” he stated in his book The Making of the Pacemaker. “I do think He wants me to try and to try hard, but the reward is in the doing, not in the results.”

On the occasion his efforts did not produce the results he was expecting, he said: “My most abject failure may be part of some grand success in His sight that may never take place in my lifetime. You know, nine out of ten of my efforts were failures, but the 10th paid for the other nine.”

Houghton College has benefited in countless ways from this generosity—he and his wife, Eleanor, were the college’s most generous donors to date. In addition to contributing to the science program in the ’70s, they invested in Houghton’s School of Music by creating a $15 million endowment to establish the graduate program in music at Houghton College. In appreciation for this transforming investment in Houghton students and faculty, the Board of Trustees added the Greatbatch name to the School of Music.

“Dr. Greatbatch, at several key points in our history, enabled Houghton to move beyond what we had previously thought possible,” says Houghton College president Shirley A. Mullen ’76. “His support of the sciences and music at Houghton have been critical to the ongoing strength of these core programs. We are grateful for donors like Dr. Greatbatch who have partnered with us to realize Houghton’s full potential.”

Houghton College president emeritus Daniel Chamberlain was always inspired by his interactions with Greatbatch. “He was the most creative person I have ever known. He never stopped—never stopped,” said Chamberlain. “He was still thinking about the future—even at the end of his life.”

“He was a humble genius,” says Howard. “One who embodied all of the best qualities of a scholar, a servant, and a scientist.”

Greatbatch is survived by his daughter, Anne Maciariello; three sons, Warren Greatbatch ’73, Kenneth Greatbatch, and John Greatbatch; 12 grandchildren; and eight great-grandchildren. He was preceded in death by a son, Peter; and his wife, Eleanor.
Evangelical Alliance Mission. After returning to the U.S., he was a professor at Lancaster Bible College and Columbia International University, as well as working for the Bible Christian Union Mission as the director of personnel. He was preceded in death by his wife. Boughter is survived by two daughters, Esther Rapson and Susanna Rohrer; three sons, Mark Boughter ’68, Daniel Boughter and Andrew Boughter; a sister, Amelia Schnirel; 11 grandchildren; eight great-grandchildren; and two nephews.

Harriet [Ruth] (Peyton) Boughter, 88, passed away on September 13, 2010 in Lebanon, Pa. She had been a registered nurse at Calvary Homes & Brethren Village in Lancaster for 10 years before retirement, and prior to working as a nurse, Boughter and her husband, Charles [Luke] ’49, spent 25 years in Portugal as missionaries with The Evangelical Alliance Mission. She is survived by two daughters, Esther Rapson and Susanna Rohrer; three sons, Mark Boughter ’68, Daniel Boughter and Andrew Boughter; two half sisters, Faith Samuel and Lois Mateer; 11 grandchildren; eight great-grandchildren; and two nephews.

Chester Rudd went to be with his Lord on February 5, 2011. During his time at Houghton, Rudd was part of the crew that started the radio station and worked on the construction of East (Gillette) Hall. He has served as Alumni Board president and, because of his love of the school, began a scholarship in his father’s name. He is survived by his wife of 58 years, Ruth (Knapp ’51); his six children, Marjorie Webber ’75, Richard Rudd ’78, Valerie Schermerhorn ’78, Daniel Rudd, Andrew Rudd ’83, and Peter Tang ’89; 17 grandchildren; and four great-grandchildren.

Harold A. Stopp, 80, died on April 24, 2011. He was preceded in death by his wife, Barbara. He is survived by his children, David, Linda, Sandy, Craig, and Steven; 12 grandchildren; sister, Joy; brother, Carl; and several nieces and nephews.

Annalee Schultz
Beloved advocate for students; completely dedicated to her husband, family and church; the maker of “oh-so-scrumptious” blackberry pies; and the fastest typist Lucekey Building has ever seen. Annalee Schultz, 84, died peacefully on August 30, 2011, at her home in Uxbridge, Mass.

Annalee Price came to Houghton in 1952, at the urging of fellow Cleveland Bible College classmate, Carl Schultz ’53, who encouraged her to find work at the college while he spent a year taking classes. She worked in both the Development Office and the Registrar’s Office over the years and ministered with Carl at two local churches.

“Even with two full time careers—one at Houghton College and the other with my dad in their two churches—she always found the time to sew a special dress, type term papers and attend our many concerts,” says daughter Esther Brenner ’79. “Whenever I would stop by to see her at the office,” remembers son Carl Schultz ’83, “she always made time for me and would make sure to introduce me to everyone in the area.”

Over the 41 years she served with Carl at the Hinsdale, N.Y. and Ischua, N.Y. United Methodist churches, she taught Sunday school, directed the choir, played the organ, visited the sick, directed the children’s program, played the piano, helped to plan services, and did whatever else was needed. “Annalee wasn’t just the organist at both Hinsdale and Ischua,” says Jan Bishop, long-time friend, and member of the Hinsdale United Methodist Church. “She was much more. […] She was the backbone that kept our two churches more like a family than a church.”

Annalee is also fondly remembered for her baking. “It was even rumored that the reason my dad, Dr. Schultz, was faculty advisor for the Student Senate for so long was due to my mom’s excellent desserts at the cabinet meetings,” says daughter Barbara Rhodes ’78.

Annalee is deeply missed by her husband of 56 years, Carl Schultz ’53; and her children, Barbara (Wayne ’80) Rhodes ’78, Esther Brenner ’79 and Carl (Jean Kephart ’85) Schultz ’83. Also surviving are a sister, Barbara Searle; a brother, Sam Price; and four grandchildren. She was preceded in death by a sister, Helen Cunningham.
Robert Lytle
Former Houghton College Trustee and Board Chair, Dr. Robert N. Lytle ’39, died peacefully Tuesday, July 26, 2011 in St. Mary’s, Ohio. He was 93 years old.

“Houghton College was very important to my dad,” says son, Wesley Lytle ’67. Robert’s close involvement with the college spanned several decades: from the time he was a student in the late ’30s to when he met and married Louise (Dietrich ’41) in the early ’40s, to the years he sent his own children to Houghton, to when he served on the Houghton College Board of Trustees from 1972 to 1984. In 1984 he received the Houghton College Distinguished Alumnus Award, and to date over 25 of his relatives and descendants have attended the college.

“He had a spirit of service and an interest in higher education that still permeates the Lytle family,” said former Houghton College President Daniel Chamberlain.

This same spirit of service defined Robert’s entire life. After pastoring the Fillmore Wesleyan Church for four years following his college graduation, he moved with his family to Colombia, South America, where he served for several years as a Wesleyan missionary. In 1959, he accepted an administrative position in the General Department of World Missions of The Wesleyan Church in Marion, Ind., and was later elected General Secretary (CEO) of Wesleyan World Missions by the General Conference.

“My grandpa tended to the lives around him the same way he gardened,” remembers granddaughter, Andrea Summers. “He paid attention to details. He gave people space to grow. He shared his Spirit-driven insightfulness only when others were ready to hear it. He loved without needing or expecting anything in return.”

“My father’s favorite verse was Colossians 1:18, ‘…that in everything He [Jesus] might have supremacy,’” said son Wes. “Dad lived his life this way. It is the legacy he gave us.”

Robert is survived by his sons, Wesley ’67 (Rebecca Tam ’66) and Bernard ’69 (Kathy Sorrentino ’69); a daughter, Jule Kind; seven grandchildren, including Jennifer (Chris ’97) McNiven ’97 and Kristin Kinser ’99; and 18 great-grandchildren. Preceding him in death was his wife, Louise (Dietrich ’41); a son, Bruce Lytle; and two sisters, Mary Woodard ’33 and Florence Bence ’36.

1953
Edward Danks, 80, passed away on August 29, 2011 in South Carolina. Danks was a member of the Presbytery of Southern New England, and spent many years as pastor of First Presbyterian Church of Burbank, Calif. After his retirement, he served as a missionary in Kenya. He is survived by his wife, Coreen Danks; son, Edward Danks; daughter, Debra Annin; brothers, Howard Danks and Richard Danks; sister, Marilyn Eddleston; six grandchildren; and three great-grandchildren. He was preceded in death by his first wife, Barbara (Bean ’53); and son, Thomas Danks.

1955
Ernest Hickman married Ruth Maher on August 20, 2011.

1956
Roger Arnold, retired pastor and hobbyist, has his collection of over 250 vintage flashlights on display at the Doniphan County Public Library in Troy, Kan.

1957
Mary (Tysinger) Stephens, 74, entered her heavenly rest on November 23, 2010. During her teaching career, Mary taught in several school systems, including in New York State and Weisbaden, West Germany. She loved to travel and traced many of the travels of Jesus and the apostle Paul. She is survived by her husband, Bill ’58; sisters, Doris Essepipan ’55, Pattie Linton ’56, Margaret Ross ’59, and Faith Lamphier ’65; and brothers, James (Bud) Tysinger ’65 and John Reed.

1954
Mildred E. (Bedient) Rose, 79, passed away on September 13, 2011. She began her teaching career at Wilsonian Academy in Angelica, N.Y. and then taught special education in various schools throughout Allegany County. She is survived by her five children, Leslie Rose, Myron Rose, Lucinda Lorow, Dwayne Rose, and Melanie Davis; 12 grandchildren; 17 great-grandchildren; former husband, Emmett Rose; and dear friends.
1958
Brian Armstrong, 74, passed away at his home in Hiawassee, Ga. Armstrong was an expert on Calvinism and was professor emeritus of history at Georgia State University. During his 31 years at GSU, Armstrong was also a department chairman and assistant dean. He served as president of the Calvin Studies Society, the Sixteenth Century Studies Society and the International Congress for Calvin Research. His wife of 52 years, Carol (Demarest ’59), survives. Other survivors include two sons, Brett Armstrong and Curt Armstrong; two brothers, Kent Armstrong and Larry Armstrong; a sister, Bonnie Montgomery ’62; and seven grandchildren.

1960
Stanley Sandler recently completed a classified book-length historical study for the Central Intelligence Agency.

Ron Waite and his wife, Charlotte (Wintsch ’61), celebrated their 50th wedding anniversary on May 29th, 2011 in Holden, Mass. Friends, relatives and family members celebrated with the couple, as well as some special Houghton folks they have kept in close touch with over the years. Pictured in the front row are Gerald Campbell ’58, Deborah (Waite ’86) Polakowski, Linda (Fleetwood ’58) Campbell, and Charlotte (Wintsch ’61) Waite. Pictured in the back row are William Roese ’56, Jane (Gregg ’60) Roeske, Patricia (Frey ’60) Nichols, Laurie (Mazza ’60) Valandra and Ronald Waite ’60.

1961
The Houghton College Class of 1961 spent its 50-year reunion as Golden Highlanders during commencement weekend this past May. Their weekend highlights included a class hymn sing, lots of time together with Houghton classmates, and places of honor at the baccalaureate and commencement services. All class members were also invited to contribute to Words of Wisdom, a collection of advice from the Class of 1961 that was presented to each graduating senior in the Class of 2011.

1962
David Kramer passed away on Thursday, March 3, 2011. He is survived by his wife, Elizabeth (Pratt ’63).

1965
Karen (Greer) Lynip and her husband, Steve ’65, are delighted to announce that they are returning to their former ‘home’ in Davao, Philippines, for a three-year term with Wycliffe Bible Translators and SIL International. They will have the privilege of serving the missionary teams and their partners while also offering 75 percent of their time and energy to the wider Asia area in roles that will allow them to guide country-planning efforts.

1966
Dr. Clarence [Bud] Bence has retired from full-time teaching at Indiana Wesleyan University. At commencement in April, he was honored as the University’s first recipient of the World-Changing Faculty Award given to an individual whose life has had a global impact. He will continue as church historian in residence at Wesley Seminary at IWU and plans to remain active in speaking, writing and teaching overseas.
Tom Seyler married Parichat [Mam] Jatuphatarayankorn of Pranakorn Bangkok, Thailand on September 24, 2011 in Elmira, N.Y. Seyler recently retired after 37 years of working as a schoolteacher with the New York State Department of Correction, and Mam is mostly retired from her family's jewelry manufacturing and sales business. 06

1967

Ann (Boyer) LaPere recently completed a 48-foot mural titled “The Scarlet Cord.” The work of art was painted using acrylics and took a year and a half to produce. The mural consists of 12 canvases, each measuring 4 feet by 6 feet, and they are mounted as four triptychs in the cupola of the new family life center at Cape Carteret Baptist Church in Cape Carteret, N.C. 07

Dan Perrine is founding director of Advancing Leaders International, an organization based in Redding, Calif. that develops Christian leaders in third-world countries through education and coaching. Currently ALI is working in Kenya and Uganda to improve schooling and education for African youth. 1968

Carol (Backenstoe) Bence has retired from her position as director of the RNBS (post-licensure) program at Indiana Wesleyan University. During her six years of leadership, the program has grown to serve over 1,300 adult students. She and her husband, Clarence [Bud] Bence ’66, hope to be involved in short-term missions during their ‘encore’ careers. 05

1969

Van Wiedemann and his wife, Sandi (Krull ’69), retired on June 12, 2010 after serving 25 years in Christian education. Additionally, the Wiedemans authored a tract titled “What If?” after a motorcycle accident nearly took Van’s life in 1988. They have handed out over 2,000 tracts to bikers, and as a result, Van has had the opportunity to share his story at church bike blessings as well as at bike dealerships. 1971

Charles Sherman, 63, passed away in Lyons, N.Y. He is survived by his sister, Georgia Young. 1973

John Buckwalter was awarded the Fulbright Community College Faculty Award and will spend two years teaching at Astrakhan State Technical University in Astrakhan, Russia. Buckwalter is a State University of New York Distinguished Teaching Professor, Physical and Health Sciences, and has been a member of the Alfred State College faculty since 1982. 08

1975

Jeff Prinsell recently received the American Academy of Dental Sleep Medicine Distinguished Service Award. Jeff is a past president of the AADSM, founding president of the American Board of Dental Sleep Medicine, past chair of the American Association of Oral & Maxillofacial Surgeons’ obstructive sleep apnea (OSA) section, and served on the American Academy of Sleep Medicine Standards of Practice Committee Task Force to update the practice parameters for OSA surgery. His most notable clinical research is a 100 percent success of maxillomandibular advancement (MMA) surgery for OSA in 50 consecutive patients, and his new chapter on “MMA OSA surgery” is in the textbook Current Therapy in OMS. Prinsell is visiting faculty lecturer at Emory University and Vanderbilt University, surgical consultant at several Atlanta sleep centers, and maintains an OMS private practice in Marietta, Ga. He lives in Marietta with his wife, Kim, and sons, Jeffrey and Eric. 1978

Alvin Hoover received the highest honor for a hospital chief executive officer (CEO) in the U.S. by being named CEO of the Year by Quorum Health Resources. He is employed by King’s Daughter Medical Center in Brentwood, Tenn. 09
Nancy (Boyd) Kennedy has published the book *Miracles and Moments of Grace*. Kennedy decided on the profession of journalism after taking her first journalism class at Houghton, taught by Professor Nancy Barcus.

Efrain Rivera was appointed senior vice president, chief financial officer and treasurer of Paychex, Inc., a leading provider of payroll, human resource, and benefits outsourcing for medium-sized businesses. Prior to this appointment, he was the vice president of finance and administration for Houghton College.

The Houghton College Student Scholarship Fund helps Houghton equip young men and women who have both the preparation and the motivation to make a difference in our world today – not just in their first year out of college but over the course of a lifetime.

Houghton College provides an education that answers the deeper human questions of meaning and purpose. It connects students’ gifts to a theological and moral vision – to a foundation of truth revealed in Scripture and in the person of Jesus Christ.

Give today and invest in the life of a Houghton student.

We are committed to raising $1,000,000 for student scholarships by May 31, 2012
